

## Anaconda installation

- Download and install the version of Anaconda for your OS from <https://www.anaconda.com/download/>. Choose the version for Python 3.7.
- Start Anaconda Navigator
- Launch Jupyter Notebook and create a New Notebook for Python 3.
- Type following commands to test the availability of the necessary libraries.

```
In [1]: import numpy  
        numpy.__version__
```

```
Out[1]: '1.14.0'
```

```
In [2]: import pandas  
        pandas.__version__
```

```
Out[2]: '0.22.0'
```

```
In [3]: import sklearn  
        sklearn.__version__
```

```
Out[3]: '0.19.1'
```
